- Adjustable Reading Line and Masks
- Freeze Frame
- Built-in writing stand
- Four-hour continuous use rechargeable battery
- Connect to a TV
- Carrying case

The most versatile on-the-go video magnifier for low vision

Whenever and wherever you need a little help reading, SAPHIRE covers your on-the-go magnification needs. Now you can read menus, verify store receipts, see details on maps, decipher bus and transit schedules — even read labels on over-the-counter medicines while at the drug store — with one compact and versatile battery-operated video magnification solution.

See crisp, clear large type and details

The sliding fingertip control raises and lowers magnification from 3.4x to 16x on a brightly lit seven-inch display screen. Adjust magnification at will, without the need to refocus — great for reading newspapers with large headlines and small body text. The SAPHIRE lies flat on reading material, so there's no shaking or hand fatigue. Adjust the text and background color on the screen for high-contrast black and white, white text on black, full color — or any of the 23 available high-contrast color combinations.

Choose from three colors: Red, Blue, or Slate

Write with the SAPPHIRE - or connect it to your TV

The built-in reading stand gives you space under the camera to take notes, jot down phone numbers, and fill out forms. Use the included standard video cable to connect the SAPPHIRE to a TV for even higher magnification.

So easy to use

Simply turn the SAPPHIRE on with a push of a button, place it over your document, and use the slider to adjust the magnification. One button switches between different text and background color combinations. When you're done with your SAPPHIRE, snap it shut, and tuck it into its included carrying case, your tote bag, or a desk drawer.

Magnification for every situation

The SAPPHIRE takes some of the challenge out of purchasing over-the-counter drugs and packaged foods. While at the store, flip the screen, and hold items over the camera to magnify the small details about ingredients, warnings, contents, and price. The Freeze Frame feature lets you bring the information close for reading, without removing items from the shelf.

Specifications

Magnification Range

3.4x to 16x - continuous
